

## Traffic snippets

A couple of sample snippets from passing traffic

This is a recording from the side of a dual carriageway during a quiet time, most of the traffic passes from right to left, similar sounds throughout the sample, the traffic being fairly well spaced with about 17 pass-bys, so tails in and out are good in a couple of spots.

version of the wave file (3.91 MB)

This is

the Stereo 44.1 kHz wave in a rar (29.52 MB)

This sample was recorded on the outskirts of a coastal town near a small cross junction on the right and way off in the distance a roundabout on the left. This is quite a busy sample with traffic going in all directions, some right left, others left to right while in the distance at times distinct vehicles can be heard like at 1m28s on the left. All during the sample there are seagulls screeching all around, the slight ringing sound in the distance on the right at about 2m11s is a pedestrian crossing beeping that it's safe to cross.
