

Wood and Rod Drum kit - DK+ RM4 Wave

First sample recording and sample upload for 2008.

This is two small, but layered drum kits, the main emphasis on the toms and hats being struck by either rods or wood drumsticks. The wood kit is the main one; with Remo toms sized 12-13-14 and 15 inch. The kick is a mono low 15 inch Tom. Both kits share the kick and Ludwig snare being struck via the wood drumsticks. Also in the kit is a crash, ride and sticks being struck together.

To get a quick idea of the sound [click here](#) to play this short MP3 done with the RM4 version. (500 KB).

The Samples are stereo 24 bit 48 kHz with two DK+ presets included.

To Download the stereo waves with the DK+ presets [Click Here](#) (27 MB)

I also done two presets for the RM4

To Download the RM4 version in RM4 propriety format [Click Here](#) (40 MB)

I also sampled the hats with a beater and flix and a couple of crashes

To Download the crash and hat 24 bit waves [Click Here](#) (18 MB)
